SUMMARY

Data Engineer with **2.5+ years of experience** designing and implementing **scalable, cloud-native data solutions**. Skilled in building efficient **ETL workflows** and **distributed data systems** leveraging **Python**, **Spark**, **GCP**, and **CI/CD**. Strong sense of collaboration and ownership of data solutions, driving **architecture decisions** and **performance optimizations**.

SKILLS

Big Data Frameworks	PySpark, Databricks, Bigquery, Airflow, Hadoop, Hive
Programming Languages	Python, Advanced SQL, Bash, JavaScript
Cloud	GCP (Bigquery, cloud function, Dataflow, Dataproc, Pub-Sub, GKE)
DevOps	Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD
Databases	MySQL, PostgreSQL, MongoDB
Concepts	Data Warehousing, Data Modeling (Star/Snowflake), CAP, ACID

WORK EXPERIENCE

Data Engineer July 2024 - Present
Onix India

- **Modernized on-prem ETL pipelines** for a leading US telecommunications client using **Apache PySpark**, **Python**, **BigQuery**, and **SQL**, improving pipeline reliability by **40%**.
- Optimized **SQL queries** and **data pipelines**, boosting overall performance and reducing runtime by **60%** through best practices and tuning techniques
- Developed **Python utilities** (**AWS → GCS transfer**, **XML parsing**, **Google Sheets extraction**), increasing automation and reducing manual effort by **50%**.
- Implemented **Cloud Functions** and **Dataflow** for streamlined **streaming ETL** jobs.
- Scaled ETL pipelines to ingest **2B+ records/hour**, cutting latency by **35%** through **adaptive query execution** and strategic caching/persisting of RDDs.
- Engineered a dynamic **Airflow DAG factory** framework, enabling generation of multiple DAGs from properties files and reducing development effort by **70%**.

Data Engineer Feb 2023 – May 2024
Magik Eye *India*

- Collaborated with **cross-functional teams** (product managers, developers, designers) to implement scalable **data features** using **Python** and **SQL**, resolving production issues and improving application performance and reliability by **30%**.
- **Built and maintained automated data validation pipelines** integrated with **Google Cloud Build** and **Cloud Functions**, enabling continuous **data quality checks** and reducing deployment time by **40%**.
- Developed **Python-based ingestion scripts** to capture **real-time sensor data** and perform **image processing** computations, storing processed results in **Big-Query** for downstream analysis. Visualized patterns using **Matplotlib** and **Seaborn** for faster decision-making.
- Implemented a **3D point cloud algorithm** in **Python** using **OOP principles**, reducing computation time by **25%** and enhancing code reusability.

EDUCATION

Bachelor of Technology, Dr. Babasaheb Ambedkar Technological University Jul 2019 - Jul 2023
Major: Computer Science *CGPA: 8.51 / 10*

ACHIEVEMENTS

- Ranked **3530** at **Google Kick Start – Round E (2022)**.
- **Google Cloud Associate Cloud Engineer (GCP ACE)** Certification
- **Rising Star of the Month Award** – October 2024 (**Onix**)
- **Spot Award of the Month** – April 2025 (**Onix**)
- **SAP Certified Application Associate – SAP Analytics Cloud**
